ENGLISH is the native tongue of one of the compilers of this collection of idioms, Spanish that of the other, and each of them is familiar with both languages. Only by such co-operation could results of any considerable value have been attained. An idiom is a phrase stamped by the usage of a language with a signification other than its grammatical or logical one. Our effort has been to bring together as many of the idioms to be met with in literary and conversational Spanish as possible, but not to include the technical phraseology of the professions and trades, or mere vulgarisms. These lines are not always easy to draw. Nautical terms, for example, often appear in very light literature, most of which would certainly also be set down in a technical dictionary. Many such may be found in the following pages. The more abstruse terminology of the law, on the other hand, seldom makes its way into belles-lettres or into conversation, and is excluded. The distinction between admissible slang, or homely phraseology, and downright vulgarisms is also far from sharp, and depends more or less upon circumstances. We have omitted some phrases which, though they appear in literature, have no business there. Many of the idiomatic phrases are proverbs, but proverbs not containing idioms are excluded.

The method employed in compilation was as follows: "El Novisimo Dicciónario de la Lengua Castellana, por una Sociedad de Literatos" (which is founded upon the Academy's Dictionary, with additions), and "El Nuevo Dicciónario Inglés-Español, y Español-Inglés, por J. M. Lopez, E. R. Bensley, y otros," were carefully read through from beginning to end, and the numerous idioms cited in illustration of the use of words were extracted. Much material has also been obtained from grammars, including those of Professors Alberto de Tornos, W. I. Knapp, H. M. Monsanto, and Louis A. Languellier, as well as from Bohn's Spanish

Proverbs. Don Quixote, in several editions and translations (including the late translation with critical list of proverbs by John Ormsby, London, 1885), and Gil Blas have been carefully studied; and notes of idioms were made in reading many other works; finally, memoranda were kept of such as occurred in conversation during a period of two years. These means cannot be exhaustive, but we believe that few common, important, or valuable phrases have escaped us. In rendering the idioms into English, the first object was to make their meaning intelligible; the second, to give equivalent English idioms where such could be found: in many cases, however, the pithiness of the original is best retained by a simple translation. Renderings found in previous publications were adopted only when it seemed impossible to improve upon them, and it has been found necessary to correct many downright errors of translation. Our thanks are due to Commander Henry Glass, of the United States Navy, for examining and improving the translations of the nautical phrases.

The arrangement of the work is intended to facilitate reference as far as this can be effected with material of so heterogeneous a character. Every idiom containing a verb is placed under that verb, while the verbs themselves are arranged alphabetically. Where the idioms containing a particular verb are numerous, they have been classified into natural groups, the members of which are mutually illustrative, or deal with similar ideas. The idioms containing verbs form the first and larger portion of the collection. Those which lack a verb are comprised in a second division, in which the most emphatic or most important word in each phrase is taken as the basis of their alphabetical arrangement. Indices to each series are added as a further aid in the search for a given phrase.

Finally, we believe ourselves justified in the hope that this collection of idioms will prove a very important aid in mastering one of the greatest difficulties which the Spanish language presents.

MODERN LANGUAGES.

Beginners' Book in French.

Illustrated with humorous pictures. By SOPHIE DORIOT. Small quarto. 304 pages. Mailing Price, 90 cents; for introduction, 80 cents.

CHILDREN, for whom this book is designed, care nothing for the intrinsic meaning or value of words. In order to obtain satisfactory results in teaching them a foreign language, it is necessary to amuse them, awaken their enthusiasm, or appeal to their sympathy. In object-teaching, it requires teachers of exceptional ability or of special energy to experience and communicate a never-failing enthusiasm about the chair they are sitting on, or the table placed before them. On the other hand, the author has found that by giving children and other beginners subjects which they like, or which are calculated to excite their curiosity, they will, in order to conquer the point which is luring them, master words and expressions in a time and manner that cannot be secured by the best-arranged methods.

It is on this principle that the present book has been prepared. It is intended as a relief to teachers, and a source of pleasure as well as instruction to young pupils. The pictures have been made as humorous as possible. They are exact illustrations of the text following them, having been drawn expressly to accompany it.

Part II. contains a considerable amount of excellent reading material, interesting and at the same time easy.

E. S. Joynes, *Prof. of Modern Languages, South Carolina College*: It makes the beginning of French so charming that all the children who see it will be crying to learn French. I have never seen any similar book so exquisitely conceived and so faithfully and beautifully executed. (*Feb. 20, 1887.*)

Le Francais, *Boston*: C'est bien là le livre que les maîtres devraient mettre entre les mains des *enfants américains* qui étudient notre langue. (*February, 1887.*)

A. La Lande, *Teacher of French, Home School, Darien, Conn.*: I consider the book absolutely perfect.

MODERN LANGUAGES.

Spiers' New French-English Dictionary.

Compiled from the French Dictionaries of L'Académie, Bescherelle, Littré, etc., and the English Dictionaries of Johnson, Webster, Richardson, etc., and the technical works in both languages. By Dr. SPIERS, Agrégé de l'Université, Chevalier de la Légion d'Honneur, Officier de l'Instruction Publique. Twenty-ninth edition, entirely remodelled, revised, and largely increased by H. WITCOMB, successor to Dr. Spiers at the École des Ponts et Chaussées. Crown 8vo. Half morocco. 782 pages. Mailing Price, \$4.85; for introduction, \$4.50.

DR. SPIERS continued, so long as he lived, to collect materials for the improvement and the enlargement of his great work. These materials, supplemented where necessary, have now been incorporated by most competent hands, and this work, after forty years of success, is the newest exhaustive French Dictionary.

This is the only authorized American edition.

This book comprises: (1) all the literary and colloquial words; (2) the principal terms relating to science, art, commerce, industry, and the navy; (3) compound words that are not to be translated; (4) the various meanings of each word arranged in logical order, and separated by numbers; (5) short instances of colloquial or literary uses of words, also of grammatical constructions where difficult; (6) alterations in the meaning of words, according as they are used with adjectives, prepositions, adverbs, etc.; (7) the idioms and colloquial expressions that differ in the two languages; (8) the prepositions required by the government of verbs, adjectives, etc.; (9) irregular or difficult pronunciation made clear; (10) grammatical notes on difficult constructions; (11) typographical signs to distinguish between the proper and figurative uses of words, and marking the style to which they belong; (12) a vocabulary of proper names.

Spiers' English-French Dictionary.

Crown octavo. Half morocco. 910 pages. Mailing Price, \$4.85; for introduction, \$4.50.

THE plan of this work is similar to that of the French-English Dictionary.

M. Blanqui , <i>Membre de l'Institut</i> : Cet excellent ouvrage qui me semble digne au plus haut point de	l'attention du monde savant. . . . C'est un travail tout a fait neuf, sérieux, approfondi, complet.

MODERN LANGUAGES.

Modern French Readings.

Edited by WILLIAM I. KNAPP, Professor of Modern Languages in Yale College. 12mo. Cloth. 467 pages. Mailing Price, \$1.35; Introduction, \$1.20.

THE selections have been made with reference to style and vocabulary, rather than to the history of the literature, so as to enable the reader to acquire experience in the popular, social, every-day terms and idioms that characterize the writings of the French to-day. They embrace about a year's study.

Tribune, Chicago: To familiarize the young with what may be called the French of the people, which now dominates the French of literature, the work of the accomplished professor of modern languages at Yale College cannot be too highly commended.

A Grammar of the Modern Spanish Language.

As now written and spoken in the Capital of Spain. By WILLIAM I. KNAPP, Professor in Yale College. 12mo. Cloth. 496 pages. Mailing Price, \$1.65; Introduction, \$1.50.

THIS book aims to set before the student, clearly and completely, yet concisely, the forms and usages of the present speech of the Castiles, and to fix them in the memory by a graded series of English-Spanish exercises. The work is divided into two distinct parts, — a Grammar and a Drill-Book.

The inflected parts of speech are presented on a new, and, it is believed, a more judicious method, and the so-called irregular verbs are considerably reduced in number. A few reading lessons are appended, with an appropriate vocabulary, for those who may not care to follow the exercises.

Schele De Vere, Prof. of Modern Language, etc., University of Virginia: After a careful, practical examination of your strikingly handsome edition of Professor Knapp's Grammar, I am convinced that it is by far the best work of its kind. Having myself published — many years ago — a Spanish Grammar, which in its day was successful, I ought to be no incompetent critic. I shall certainly use the book in this university. (Dec. 19, 1882.)

Modern Spanish Readings.

By WILLIAM I. KNAPP, Ph.D., Professor of Modern Languages, Yale College. 12mo. Cloth. 458 pages. Mailing Price, \$1.65; Introduction, \$1.50.

MODERN LANGUAGES.

THE 200 pages of text represent the average modern style of composition in the newspaper article, the novel, the essay, history, and criticism.

George L. Andrews, *Prof. of Modern Languages, United States Military Academy, West Point, N.Y.*: Professor Knapp's Spanish Grammar and Modern Spanish Readings have been in use as text-books at the Military Academy for the last three years, and have been found very satisfactory. For any serious study of the Spanish Language by those whose vernacular is the English, I know of no other grammar that is nearly as good as that of Professor Knapp. (March 17, 1886.)

Spanish Idioms, with their English Equivalents,

Embracing nearly 10,000 phrases. By SARAH CARY BECKER and Señor FEDERICO MORA. 12mo. Half morocco. 330 pages. Mailing Price, \$2.00; for introduction, \$1.80.

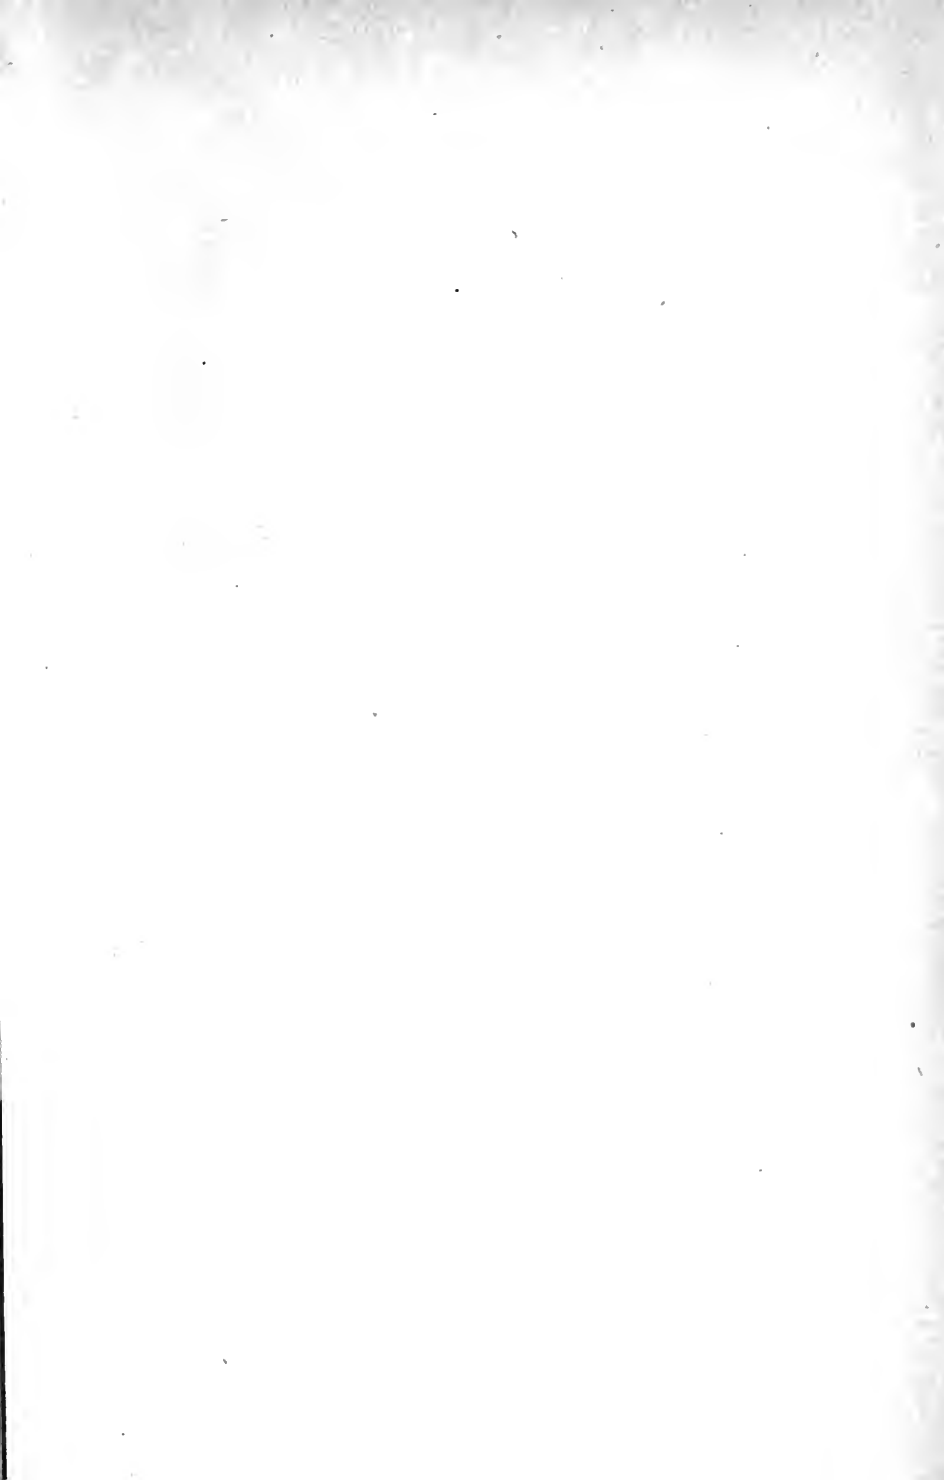

THIS is as nearly as possible a complete collection of Spanish idioms, or of Spanish phrases which, if literally translated, would fail to convey to foreign ears the sense in which they are understood by Spaniards. No approximately complete collection of these idioms has hitherto been published, either separately, or scattered through any more comprehensive work. The translations have been made with great care, and numerous errors in the readings found in Spanish-English dictionaries are here corrected. The idioms are arranged on a plan so simple that any phrase may be found with the utmost ease. Spanish literature and conversation fairly bristle with idioms, and this difficult feature of the language is here adequately dealt with for the first time.

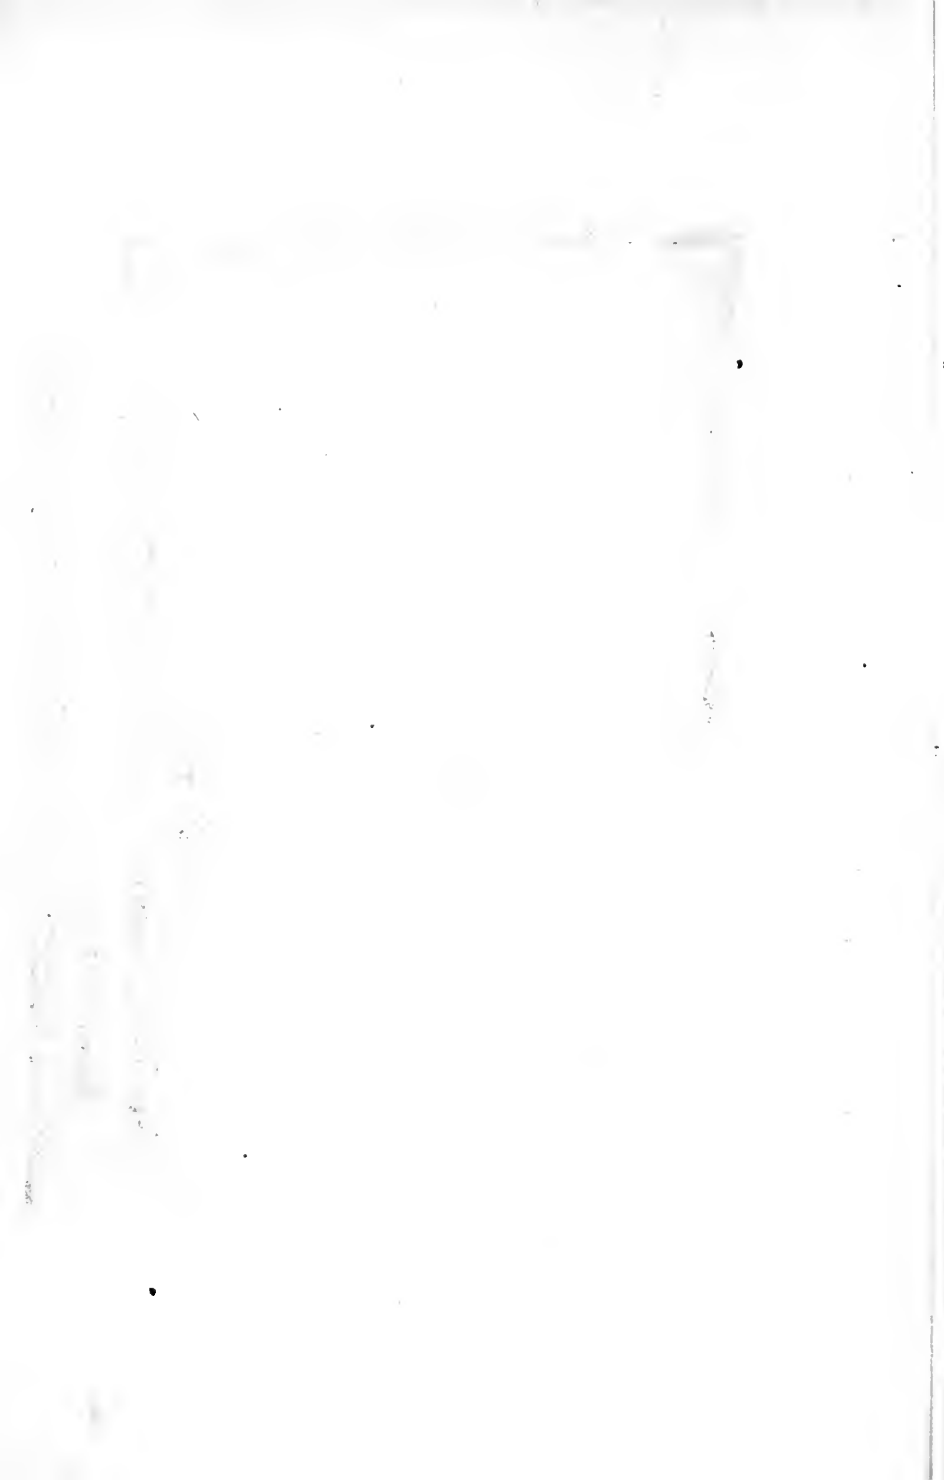

J. F. Sarrario, *Sec'y of the Spanish Legation, Washington*: All the expressions are thoroughly idiomatic. They are very well translated. The book will be very useful, not only to beginners, but to the more advanced students.

An Alphabetical Table of German Prefixes and Suffixes.

By WILLIAM COOK, Editor of *Otto's Grammar*. 4 pages of tough paper, 8 x 10 inches. Price, 5 cents.

THIS may be used either for reference or for regular lessons, in connection with any text-book.
